

Job Descriptions for the role of

- MERN Stack Developer
- MEAN Stack Developer
- Python Developer
- Data Scientist / Data Analyst
- Cybersecurity Analyst
- Game Developer
- Flutter Developer
- Golang Developer
- Machine Learning Engineer

♦ 1. MERN Stack Developer (1–2 Years Experience)

About The Role

The MERN Stack Developer works in the area of Software Engineering, encompassing the development, maintenance, and optimization of web applications. The role requires building scalable front-end and back-end solutions, integrating databases, and working closely with cross-functional teams.

Responsibilities

1. Develop and maintain web applications using MongoDB, Express.js, React.js, and Node.js.
2. Design reusable front-end components and integrate with backend APIs.
3. Debug, troubleshoot, and optimize application performance.
4. Participate in code reviews and follow software engineering best practices.
5. Collaborate with designers, QA engineers, and senior developers.
6. Deliver assigned tasks within timelines with minimal supervision.

Technical Skills Required

- JavaScript (ES6+), React.js (hooks, state, props)
- Node.js & Express.js
- MongoDB & Mongoose
- REST APIs, Git, basic deployment knowledge

Soft Skills Required

- Strong problem-solving and analytical ability
- Good communication and interpersonal skills
- Willingness to learn and adapt to new technologies
- Team player with collaborative mindset
- Time management and accountability

Experience Required: 1–2 years

Salary: ₹4 LPA – ₹7 LPA (disclosed) / Not disclosed

Education: B.Tech / B.E. in Computer Science or related field

Industry Type: IT Services / Product / Startup

Employment Type: Full Time, Permanent

Role Category: Software Development

♦ 2. MEAN Stack Developer (1–2 Years Experience)

About The Role

The MEAN Stack Developer will work on the development of dynamic web applications. The role includes designing front-end interfaces, building backend services, and collaborating with Agile teams to deliver business-critical software solutions.

Responsibilities

1. Develop front-end applications using Angular and TypeScript.
2. Implement backend services using Node.js and Express.js.
3. Design and manage MongoDB databases and queries.
4. Build and integrate RESTful APIs with front-end UI.
5. Perform debugging, testing, and performance optimization.
6. Work in Agile/Scrum cycles and maintain proper documentation.

Technical Skills Required

- Angular (components, services, routing)
- JavaScript / TypeScript
- Node.js & Express.js

- MongoDB
- HTML, CSS, Bootstrap

Soft Skills Required

- Analytical thinking and attention to detail
- Strong verbal and written communication
- Adaptability to changing project requirements
- Independent problem-solving and teamwork

Experience Required: 1–2 years

Salary: ₹4 LPA – ₹7 LPA (disclosed)

Education: B.Tech / B.E. in IT / Computer Science

Industry Type: IT Services / Product / Startup

Employment Type: Full Time, Permanent

Role Category: Software Development

◆ 3. Python Developer (1–2 Years Experience)

About The Role

The Python Developer is responsible for backend development and support of scalable applications. The role includes API development, database management, debugging, and collaborating with front-end developers to deliver quality solutions.

Responsibilities

1. Develop backend applications using Python.
2. Build APIs using Django or Flask frameworks.
3. Work with SQL databases (MySQL / PostgreSQL) and optimize queries.
4. Debug and resolve software issues.
5. Write clean, reusable, and well-documented code.
6. Collaborate with front-end developers and QA teams.

Technical Skills Required

- Python programming fundamentals
- Django / Flask basics
- SQL and relational database concepts
- Object-Oriented Programming (OOP)
- Git and version control

Soft Skills Required

- Logical and analytical thinking
- Patience and persistence in debugging
- Good documentation and communication skills
- Willingness to learn new tools and frameworks
- Ability to accept feedback

Experience Required: 1–2 years

Salary: ₹4 LPA – ₹7 LPA (disclosed)

Education: B.Tech / B.E. in Computer Science / IT

Industry Type: IT Services / Product / Startup

Employment Type: Full Time, Permanent

Role Category: Software Development

◆ 4. Data Scientist / Data Analyst (1–2 Years Experience)

About The Role

The Data Scientist / Data Analyst works with structured data to generate insights, support business decision-making, and build basic predictive models. The role includes data collection, preprocessing, visualization, and communication of findings.

Responsibilities

1. Collect, clean, and preprocess datasets for analysis.
2. Perform exploratory data analysis (EDA) to discover trends.
3. Build and validate basic machine learning models.
4. Create dashboards and reports for business teams.

5. Present actionable insights to stakeholders.
6. Collaborate with cross-functional teams to support business goals.

Technical Skills Required

- Python (Pandas, NumPy, Matplotlib, Seaborn)
- SQL and database querying
- Statistics fundamentals
- Jupyter Notebook
- Basic machine learning algorithms

Soft Skills Required

- Analytical and critical thinking
- Data storytelling and presentation skills
- Business understanding mindset
- Curiosity and continuous learning
- Ability to explain complex data simply

Experience Required: 1–2 years

Salary: ₹4.5 LPA – ₹8 LPA (disclosed)

Education: B.Tech / B.E. / MCA / M.Sc in relevant field

Industry Type: IT / Analytics / Product

Employment Type: Full Time, Permanent

Role Category: Data Science / Analytics

♦ 5. Cybersecurity Analyst (1–2 Years Experience)

About The Role

The Cybersecurity Analyst supports the organization's security operations by monitoring systems, identifying vulnerabilities, and assisting in incident response. The role involves implementing security controls, analyzing threats, and ensuring compliance.

Responsibilities

1. Monitor security alerts and investigate incidents.

2. Conduct vulnerability assessments and basic penetration testing.
3. Implement security policies and controls.
4. Analyze logs and events using SIEM tools.
5. Prepare incident and compliance reports.
6. Support security audits and awareness programs.

Technical Skills Required

- Networking fundamentals
- Linux & Windows security basics
- OWASP Top 10 awareness
- SIEM tools fundamentals
- Cybersecurity concepts and frameworks

Soft Skills Required

- High attention to detail
- Ethical responsibility and integrity
- Calmness under pressure
- Strong reporting and documentation skills
- Continuous learning mindset

Experience Required: 1–2 years

Salary: ₹4 LPA – ₹7 LPA (disclosed) / Not disclosed

Education: B.Tech / B.E. in IT / Computer Science / Cybersecurity

Industry Type: IT Services / Product / Security

Employment Type: Full Time, Permanent

Role Category: Cybersecurity

♦ 6. Game Developer (1–2 Years Experience)

About The Role

The Game Developer is responsible for designing, developing, and maintaining interactive 2D/3D games. The role involves working with game engines, implementing gameplay mechanics, optimizing performance, and collaborating with designers and artists.

Responsibilities

1. Develop games using Unity (C#) or Unreal Engine (C++).
2. Implement gameplay logic, physics, and animations.
3. Optimize game performance and memory usage.
4. Debug and fix gameplay or UI issues.
5. Collaborate with designers and artists for asset integration.
6. Participate in testing and release cycles.

Technical Skills Required

- Unity or Unreal Engine
- Object-oriented programming
- Game physics and mechanics
- Debugging and optimization
- UI/UX basics

Soft Skills Required

- Creativity and imagination
- Team collaboration and coordination
- Patience and perseverance
- Openness to feedback
- Passion for gaming and continuous learning

Experience Required: 1–2 years

Salary: ₹3.5 LPA – ₹6 LPA (disclosed) / Not disclosed

Education: B.Tech / B.E. / MCA / Game Design

Industry Type: IT / Gaming / Product

Employment Type: Full Time, Permanent

Role Category: Game Development

♦ 7. Flutter Developer (1–2 Years Experience)

About The Role

The Flutter Developer will work on cross-platform mobile application development. The role involves building responsive UI, integrating APIs, collaborating with backend teams, and ensuring high-quality mobile experiences.

Responsibilities

1. Develop mobile applications for Android and iOS using Flutter.
2. Design responsive UI and implement seamless navigation.
3. Integrate REST APIs and work with backend services.
4. Debug and optimize mobile application performance.
5. Collaborate with designers, backend developers, and QA engineers.
6. Participate in code reviews and follow best practices for mobile development.

Technical Skills Required

- Flutter & Dart programming
- Mobile UI/UX design principles
- RESTful API integration
- Firebase / SQLite basics
- Git / Version control

Soft Skills Required

- Strong problem-solving and analytical skills
- Good communication and collaboration
- Attention to detail
- Adaptability to changing project requirements
- Time management and responsibility ownership

Experience Required: 1–2 years

Salary: ₹4 LPA – ₹7 LPA (disclosed)

Education: B.Tech / B.E. / MCA in Computer Science or related field

Industry Type: IT / Product / Startup

Employment Type: Full Time, Permanent
Role Category: Mobile Application Development

◆ 8. Golang Developer (1–2 Years Experience)

About The Role

The Golang Developer will work on backend systems, API development, and high-performance applications. The role requires building scalable services, writing clean code, and collaborating with cross-functional teams.

Responsibilities

1. Develop backend applications and microservices using Golang.
2. Design and implement RESTful APIs.
3. Work with SQL and NoSQL databases (PostgreSQL, MongoDB).
4. Write clean, efficient, and maintainable code.
5. Debug, optimize, and ensure performance of backend services.
6. Participate in Agile development cycles and code reviews.

Technical Skills Required

- Golang programming fundamentals
- REST API design and implementation
- Database knowledge (SQL / NoSQL)
- Git / Version control
- Linux basics

Soft Skills Required

- Analytical thinking and problem-solving
- Strong communication skills
- Ability to work in Agile teams
- Attention to detail and accountability
- Adaptability and continuous learning mindset

Experience Required: 1–2 years

Salary: ₹5 LPA – ₹8 LPA (disclosed)

Education: B.Tech / B.E. / MCA in Computer Science or related field

Industry Type: IT / Product / Startup

Employment Type: Full Time, Permanent

Role Category: Backend Development

♦ 9. Machine Learning Engineer (1–2 Years Experience)

About The Role

The Machine Learning Engineer works on building and deploying ML models to solve real-world problems. The role involves data preprocessing, model training, evaluation, and collaboration with data and software teams.

Responsibilities

1. Collect, clean, and preprocess structured and unstructured data.
2. Build and train machine learning models using Python frameworks.
3. Evaluate model performance and optimize algorithms.
4. Deploy ML models and integrate with applications.
5. Collaborate with data engineers, analysts, and software developers.
6. Document methodology, experiments, and results.

Technical Skills Required

- Python programming (Pandas, NumPy, Scikit-learn, TensorFlow / PyTorch)
- Data preprocessing and feature engineering
- Machine learning algorithms (Regression, Classification, Clustering)
- SQL and database querying
- Model evaluation and optimization techniques

Soft Skills Required

- Strong analytical and critical thinking

- Data storytelling and problem-solving skills
- Team collaboration and communication
- Curiosity and continuous learning
- Ability to explain complex models to non-technical stakeholders

Experience Required: 1–2 years

Salary: ₹5 LPA – ₹9 LPA (disclosed)

Education: B.Tech / B.E. / MCA / M.Sc in Computer Science, Data Science, or related field

Industry Type: IT / Analytics / Product

Employment Type: Full Time, Permanent

Role Category: Machine Learning / AI Development
